EXPERIENCE

Software Developer
Wipro Technologies

JULY 2021 - Present
Bengaluru

- Spearheaded the design and implementation of web Applications using Angular, enhancing User Interface efficiency by 30% and achieving seamless integration between diverse components.
- Elevated code quality standards through leadership in comprehensive code reviews, provision of valuable feedback, and guidance for junior developers.
- Conducted extensive debugging of 100+ application issues, meticulously ensuring adherence to rigorous quality standards, resulting in a remarkable 55% reduction in reported bugs.

PROFESSIONAL EXPERIENCE

PROJECT: ORDER TO CASH (O2C)

JULY 2021 - Present

A Comprehensive Enterprise solution aimed at Optimizing and enhancing the entire sales and revenue cycle. Designed and developed a unified, user-friendly application that serves as a one-stop platform for managing the complete order lifecycle, from initial order booking to resource allocation, project details, and invoice generation.

Key Contributions :

Created Interactive-Responsive Web Application with Angular: Leveraged Angular (utilizing TypeScript, HTML, and CSS) to develop an interactive and responsive web application, showcasing proficiency in modern web development technologies.

Implemented MSAL Authentication: Successfully integrated Microsoft Authentication Library (MSAL) for secure authentication, demonstrating expertise in authentication.

Upgraded Application from Angular v11 - v14 : Spearheaded the seamless transition and upgrade of the application from Angular 11 to Angular 14, enhancing developer-friendliness and agility within the project.

Adapted to Global Employee Rule Changes: Implemented multiple application changes in response to evolving global employee rules, showcasing flexibility and compliance with regulatory requirements.

Collaborated with Cross-Functional Teams: Collaborated effectively with more than 5 cross-functional teams to conceptualize, design, and execute a responsive website, fostering teamwork and project coordination.

IAAS To PAAS Migration : Drove Front-End (Application End) Migration From IaaS To PaaS, Implementing Essential Security Measures, Including Content Security Policy (CSP) Headers And Custom Headers To Enhance Performance And Security.

Responsibilities:

- Involved in Agile, Scrum methodology with Sprint implementation.
- Writing Queries for retrieving data from backend.
- Involved in Code reviews, Code refactoring while creating Pull requests.
- Worked closely with Bussiness Team to understand Requirements, Functional Analysis and Technical Analysis
- Met aggressive deadlines, regularly collaborating with business owners and project managers in an Agile based development environment

Portfolio

- Explore my work and projects in detail, showcasing my skills and expertise.
